Experience

The Corporate Pot

June 2026 – Present

Full-Stack Developer Intern

Remote

- Developed full-stack features using the **MERN stack** and **RESTful APIs** with **JWT/RBAC** security, following MVC architecture and Agile practices.
- Collaborated via **Git/GitHub** on sprint planning and code reviews, optimizing **React.js** components and debugging production issues.

Projects

Employee Management System | *React.js, Node.js, Express.js, MongoDB, JWT, RBAC* | [Live](#) | [GitHub](#)

- Built a multi-tenant **full-stack web application** with **JWT-based authentication** and **Role-Based Access Control (RBAC)** to ensure secure, isolated data access across organizations.
- Architected **RESTful APIs** using the **MVC design pattern** with centralized input validation, error handling middleware, and structured API responses.
- Engineered task management workflows and an **admin dashboard** supporting concurrent multi-user operations with real-time data updates.
- Optimized **MongoDB** schema design and indexing strategy to improve query performance and support horizontal scalability.

ApnaDoctor – AI-Powered Health Assistant | *React.js, TypeScript, Supabase, Gemini API, OpenAI API* | [Live](#) | [GitHub](#)

- Built **ApnaDoctor**, an AI-powered symptom checker delivering real-time, context-aware health guidance using **Gemini API** and **OpenAI API**.
- Designed a resilient **AI inference pipeline** with schema-based JSON validation and fallback mechanisms to guarantee reliable, structured responses under API failures.
- Implemented end-to-end **type-safe data flow** using **TypeScript** and runtime schema validation to reduce production bugs.
- Enforced **Supabase Row-Level Security (RLS)** policies for secure, user-scoped data access and privacy-compliant health data handling.

Maya – AI Voice Assistant | *Python, Gemini API* | [GitHub](#)

- Designed a **modular voice assistant architecture** with decoupled speech recognition, AI reasoning, and service integration layers for maintainability.
- Integrated **Gemini API** to enable natural language understanding and command execution for hands-free task automation.
- Implemented structured logging, exception handling, and fault-tolerant design to improve system reliability and ease debugging.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, API Security

Databases: MongoDB, Supabase (PostgreSQL), Database Schema Design, Indexing & Query Optimization

AI/ML Integration: Gemini API, OpenAI API, Prompt Engineering, AI Pipeline Design

Tools & Platforms: Git, GitHub, Postman, Vite, VS Code, npm

Concepts: MVC Architecture, System Design Basics, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodology, Debugging & Unit Testing, Version Control

Certifications

Oracle Cloud Infrastructure (OCI) 2025 AI Foundations Associate

Artificial Intelligence – Samsung Innovation Campus

Decode Python with DSA – Course Certification

Advanced Software Engineering Job Simulation

Education

Brainware University

B.Tech in Computer Science & Engineering (AI & ML) – SGPA: 9.29/10

Kolkata, West Bengal, India

Aug 2023 – Jul 2027

Training & Workshops

Samsung Innovation Campus

Aug 2025 – Oct 2025

Training in Data Science, Algorithms, and Machine Learning

AI Robotics Workshop

Mar 2024

Hands-on training in AI-driven robotics fundamentals
